

# Pham Quang Huy

Fullstack developer

Nam Tu Liem, Hanoi  
0986865089  
huypq1801@gmail.com

I'm a passionate full-stack developer skilled in Java Spring Boot and React.js. I love building efficient, scalable, and user-focused applications. Driven by clean code and collaboration, I aim to create software that delivers real impact and value.

## WORK EXPERIENCE

**FPT Software** • 09/2022 - Present

Developer • Full-time

Intern • Internship

## CERTIFICATIONS

**TOPIK 4** • 08/2024 - 08/2026

National Institute for International Education

**OCP Java SE 17 Developer (1Z0 - 829)**

Oracle

## AWARDS & SCHOLARSHIPS

**100% scholarship - Korean Bridge SE program** • 01/2025

FPT Academy

## PROJECTS

**SecuxperDP** • 03/2024 - 08/2024

- Technologies: Java Spring Boot, React.js, PostgreSQL, MongoDB, Jenkins, SolarLint, Flyway, Docker
- A project of LGCNS to build a core system that includes base functions for other systems.
- Including full base features of related web systems such as user management, configuration management, language and terminology management, time zone and time management, setting management...
- The foundation system for other web systems in LGCNS's SecuxperDP ecosystem.

## SKILLS

### Backend Framework

- Java
- Java OSGi Framework
- Java Spring Boot Framework

### Frontend Framework

- Angular.js
- CSS
- HTML
- JavaScript
- Next.js
- React.js
- TypeScript

### Database

- MongoDB
- MS SQL
- MySQL
- PostgreSQL
- Redis

### IDE

- Cursor IDE
- Eclipse IDE
- IntelliJ IDEA IDE
- Visual Studio Code IDE

### Tools and Environments

- DBeaver
- Docker
- Draw.io
- Figma
- GitHub

### **IDP plus** • 09/2024 - 12/2024

- Technologies: Java Spring Boot, Angular.js, PostgreSQL, MongoDB, Redis, Jenkins, SolarLint, Flyway
- Human resource and facilities management system in LG Group.
- The main functions are to manage LG Group's employees and partners, company sites, LG Group buildings and facilities/resources in the building...
- Including management of the devices of the Smart Connect project below.

### **Smart Connect** • 01/2025 - 09/2025

- Technologies: Java (OSGi Framework), ActiveMQ, Docker, Linux
- Intermediary system between web system (IDP plus) and terminal of authentication devices such as fingerprint devices, face recognition devices, card swiping devices of entrance doors.
- The system will change or receive data about the status of the devices for the user interface system (web system or application) and vice versa.

### **FPT University Resources System** • 08/2023 - 12/2023

- Technologies: Java Spring Boot 3, Thymeleaf, MongoDB, Elastic Search, Gitlab, Heroku (for deploy)
- A project in which the head of the SE department of FPT University is considered as the customer.
- The project is set up to build a system to manage FPT University's electronic resources (such as lecture notes, course documents, lecture videos...).
- Target users: Lecturers and students of FPT University.

- GitLab
- Jenkins
- Linux
- Postman
- SonarLint
- SVN

### **Languages**

- English (Intermediate)
- Korean (Intermediate - TOPIK 4)

### **EDUCATION**

#### **Korean Bridge Software Engineer**

**FPT Software Academy**

GPA: 9.0

09/2022 - 02/2024

#### **Software Engineer**

**FPT University**

GPA: 8.4/10 - Very good

09/2019 - 12/2023
